

Safety is always and should be an important part of driving .. we use the News/Traffic 24/7 station and found this to be a real help with Los Angeles, California traffic, and while driving in other states too. Many times we have been able to miss traffic accidents and freeway jams because of Traffic and News 24/7.

We know regular radio stations broadcast News and also traffic situations, but not 24/7.... by the time they give us the news - many times it's too late and we are already in the situation. XM Instant Traffic & Weather channels are there at the time of need.

Please don't take this much needed help away from XM satellite. We respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we very much need, demand and deserve.

Thank You FCC for listening.
